

## The Motspur Park Gas Holders Development: Get Involved!

### Help save our green spaces and neighbourhoods.

Are you aware that the gas holders were to be brought down by 2029?  
Developers want to replace them now with 650 flats, up to 18 storeys high. However, they have failed to engage with many concerned residents.

This development could have **huge implications** for the local community.

Why you should be concerned

- **Traffic:** cars and lorries along the **only** vehicular access, **Green Lane**
- **Public transport:** trains are increasingly overcrowded
- **Public services:** GPs and hospitals are already overstretched
- **Prevailing character of the area:** our neighbourhoods are low-rise, residential suburbs
- **Biodiversity:** the surrounding area is designated Metropolitan Open Land. Two sides of the gas holder site are adjacent to 'Sites of Importance for Nature Conservation'
